

Bentivoglio, November 22nd, 2012

Dear [REDACTED]

It is a great opportunity for me to be in contact with you. I am so pleased you are willing to collaborate with ICEMS and assist us in secretariat activities.

First of all, thank you for the superb job you have done, and your patience in reviewing the English of the ICEMS position paper on the "Cerebral Tumor Court case".

Our purpose was 1) to show that the Court sentence was acknowledgment for the 15-20 years' debate and campaigning in Italy by scientists and citizens about the risk of non-ionizing radiation, specifically in the case of ELFEMF and cell phone RFEMF; 2) to mention the authors of the most important original scientific papers (in our opinion) who helped produce the scientific basis for proper regulation on non-ionizing radiation in Italy; and finally 3) to emphasize that the Italian court ruling, the first such in the world, was the result of long commitment by institutions, non-governmental organizations and independent scientists.

Concerning citation of the court consultants, the position paper only reported the names of the consultants mentioned in the Brescia Court ruling (confirmed by the Supreme Court), Prof. Grasso and Dr. Di Stefano, who, as recognized by the judges, produced the main scientific contributions.

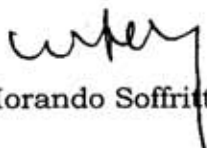

Prof. Angelo Levis claims that he too was a consultant to the Court with Prof. Saia. If he says so, it could well be true.

I can assure you that there is no political story behind what was reported in the position paper and there will be no more feedback in the future.

Both I as Chairman of the Steering Committee, and Livio Giuliani, spokesman for ICEMS, can assure you that the position paper represents the consensus of a number of independent Italian scientists. Of course, others may have different opinions.

I hope to have the opportunity to meet you soon and discuss a few issues connected with improving ICEMS activity.

With my best regards,

Morando Soffritti
