

Simona Carrubba, PhD, Louisiana State University Health Sciences Center, Shreveport, LA, USA.

Simona Carrubba

Dr. Simona Carrubba graduated from the University of Catania, Astronomy and Physics Department, in 1999. She received her PhD from the University of Catania, Engineering Department, in 2005 and since then she works as a biophysicist at Louisiana State University Health Sciences Center, Department of Orthopaedic Surgery. Her research field is neuroscience.

Detection of nonlinear event-related potentials. S. Carrubba, C. Frilot, A.L. Chesson, A., Marino. *J. Neurosci. Methods* 157:39-47, 2006.

Evidence of a nonlinear human magnetic sense. S. Carrubba, C. Frilot, A.L. Chesson, A. A. Marino. *Neuroscience* 144: 356-367, 2007.

Nonlinear EEG activation evoked by low-strength low-frequency magnetic fields. S. Carrubba, C. Frilot, A.L. Chesson, A. A. Marino. *Neurosc. Lett.* 417: 212-216, 2007.

Magnetosensory evoked potentials: consistent nonlinear phenomena. S. Carrubba, C. Frilot, A.L. Chesson Jr., C.L. Webber, J.P. Zbilut, A. A. Marino. *Neurosc. Res.* 60: 95-105, 2008.

The effects of low-frequency environmental-strength electromagnetic fields on brain electrical activity: a critical review of the literature. S. Carrubba, A. A. Marino. *Electromagn. Biol. Med.* 27(2):83-101, 2008.

Method for detection of changes in the EEG induced by the presence of sensory stimuli. S. Carrubba, C. Frilot, A.L. Chesson Jr., A. A. Marino. *J. Neurosci. Methods* (in press).

Low-strength magnetic fields consistently induce steady-state, reversible changes in human brain electrical activity. S. Carrubba, C. Frilot, A.L. Chesson Jr., A. A. Marino. (Submitted).
