

Andrew A. Marino

Andrew A. Marino is a Professor in the Departments of Orthopaedic Surgery and Cellular Biology & Anatomy, at the Louisiana State University Health Sciences Center, Shreveport, Louisiana. He has studied the biological effects of electromagnetic fields for more than 40 years. His published works (150 papers and 3 books) include reviews, theoretical studies, and experimental studies. The latter work includes many controlled laboratory studies of the effects of electromagnetic fields on human subjects and animals (rats, mice, rabbits, fish).
