

Antonella Lisi

Dr. Lisi has been conducting research on virus fusion for over 10 years. During most of the 1990s, she worked as a scientist, at the Italian National Research Council, in Rome, in the fields of membrane structure and function.. Since 1996, she has been conducting scientific research as part of an environmental medicine research program at the National Research Council in Rome for the Institute of Neurobiology and Molecular Medicine's section on Molecular Medicine laboratory, where she studies the "interaction between electromagnetic fields and living matter."
